

## WHAT IS GREEN INFRASTRUCTURE?

*Imagine Austin defines green infrastructure as strategically planned and managed networks of natural lands, parks, working landscapes, other open spaces, and green stormwater controls that conserve and enhance ecosystems and provide associated benefits to human populations (PA-19).*

## **Priority Program Sub-Teams**

### **Green Infrastructure Acquisition Team**

In order to bring a more strategic focus to the City's acquisition of new green infrastructure "assets," this team will collaborate to identify land acquisition priorities and to evaluate potential acquisitions from the perspective of maximizing "ecosystem services" and achieving multiple objectives and benefits. In addition, they will work to identify and capitalize on opportunities for interdepartmental partnerships in funding land acquisition. The team will also support a recently established administrative process for evaluating alternative public uses for land holdings considered to be "surplus" by the department with stewardship for such property.

### **Public Lands Management Team**

This team will provide an interdepartmental forum for collaboration on several key initiatives relating to the management of public lands, including completion of the Comprehensive Urban Forestry Plan, providing input to the Community Wildfire Protection Plan, implementation of Standards of Care for Trees and Vegetation, and Implementation of the Invasive Species Management Plan. The team will also ensure that land management issues and costs are considered when acquiring land. The objective, as called out in *Imagine Austin*, is to develop a more unified and comprehensive approach to management of City lands for public access and recreation, connectivity, and environmental sustainability, with full consideration of the public purpose of various land holdings and any associated restrictions.

### **Regulatory Team**

This team will provide specialized expertise to support the Land Development Code revision process. The team will evaluate current code provisions and alternative approaches and develop recommendations to improve the green infrastructure elements of the Land Development Code and other related City codes and criteria manuals.

Onion Creek.

## Major Initiatives and Key Accomplishments

### Adoption of an Invasive Species Management Plan.

In 2012, Austin became one of only two cities in the nation to adopt an Invasive Species Management Plan. The goal of the plan is to reduce and eradicate invasive species on City-owned and managed properties.

### Purchase of parkland.

The City purchased 55 acres of parkland along Onion Creek with 2006 Bond funds. This property provides excellent recreational opportunities, such as areas of open space, picnic facilities, and the potential for 6.5 miles of trail along Onion Creek.

### Investment in water quality protection lands acquisition.

The City, in partnership with others, has invested \$159,545,925 million to acquire water quality protection lands in the Barton Springs Zone of the Edwards Aquifer. Investments to date have included 9,796 acres of land purchased fee simple and managed by Austin Water's Wildlands Division, as well as 16,781 acres of land protected through conservation easements. In November 2012, Austin voters approved an additional \$30 million in bond funding to continue this program (see Spotlight: Preserving Land and Protecting Water Quality on p. 67).

#### **SPOTLIGHT: RAIN GARDENS – KEEPING WATER ON THE LAND**

In the past year, the Watershed Protection Department and the Austin Independent School District have been building rain gardens as an opportunity to bring the community together while improving school grounds. With these types of projects, students gain service-learning experiences, neighbors become more invested in their neighborhood schools, and the campus gets a rain garden that improves water quality and can act as a teaching tool. Rain gardens have been established at a number of schools—Barbara Jordan Elementary School, Gus Garcia Middle School, and Dobie Middle School. These community building efforts have engaged a variety of volunteers representing a cross-section of Austin. Retired engineers, volunteer landscape professionals, Eagle Scout candidates, and university students have contributed their time to improve these campuses.

##### **Austin Community Tree Program**

[austintexas.gov/department/community-trees](http://austintexas.gov/department/community-trees)

#### **SPOTLIGHT: URBAN FOREST**

As our big, green city develops and grows, we all want our urban forest to keep pace – our verdant canopy of big live oaks, colorful Texas mountain laurel, and other native trees that help define what we love about Austin. Happily, our community is doing a laudable job of loving its trees – as recognized by Austin recently landing on American Forest's list, “Top 10 Cities for Urban Forests.” Among the features earning Austin national accolades are forest-friendly City rules requiring that developers preserve, plant, and replace trees, and provide for their ongoing care. As new and infill redevelopment occurs, these requirements ensure that new projects do their part to beautify the city, shade sidewalks to encourage walking, and plant the next generation of our tree canopy – all essential to Austin’s sense of place. Some highlights from the past year include the Urban Forestry Program planting over 10,000 trees, Watershed Protection and PARD planting nearly 7,500 saplings, and NeighborWoods and Large Shade Tree Programs planting over 6,000 trees.

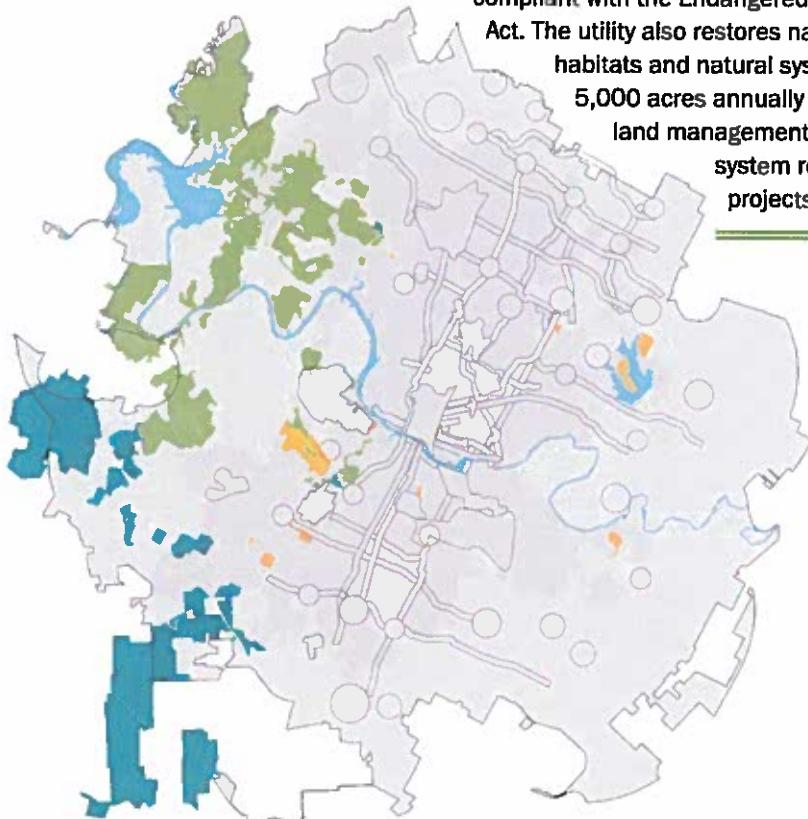

### SPOTLIGHT: PRESERVING LAND AND PROTECTING WATER QUALITY

Austin Water manages and protects over 40,000 acres of source-water watersheds to protect Barton Springs and maintain Austin's public water supplies. Austin Water also manages and protects 13,500 acres of endangered species habitat that serves as Austin's mitigation to sustain economic development and public services in a manner

compliant with the Endangered Species Act. The utility also restores native habitats and natural systems on 5,000 acres annually through land management and ecosystem restoration projects.

#### Preserved Land

■ Bacones Canyonlands Plan

■ Water Quality Protection Lands

■ Parks Department Nature Preserves

(Between 2001 and 2012, the City purchased 11,530 acres of Water Quality Protection Lands to protect the quality and quantity of water that flows into Barton Springs. Austin is actively working to use \$30 million from the 2012 bond to purchase additional land towards this aim.)

# CREATIVITY & ECONOMY

## Education + Arts + Economy

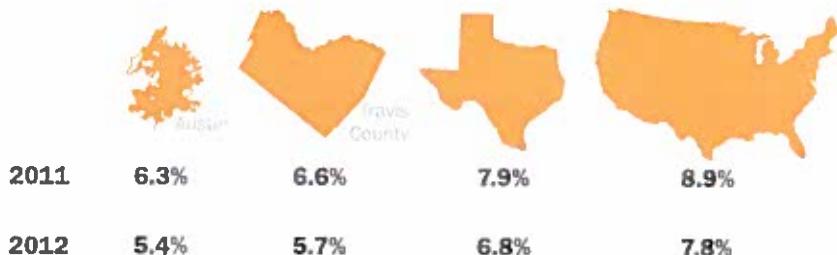

Priority Programs 3 and 5 seek to promote economic vitality. Priority Program 3 focuses on workforce development issues, while Priority Program 5 addresses Austin's creative economy.

## Current Conditions

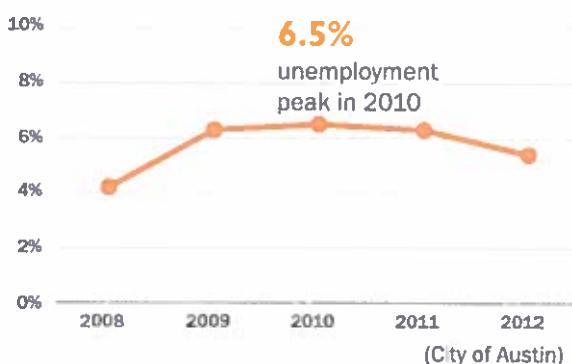

Austin's economy is in the process of rebounding from the recession. Unemployment rates are down, while the number of people working for small businesses is increasing. An essential component of the recovery has been the success of Austin's creative industries.

## Unemployment Comparison

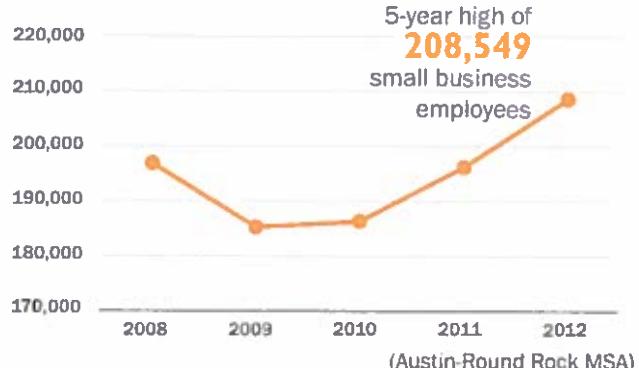

Unemployment in Austin is lower than the county, state and nation.

## Unemployment Over Time

## Small Business Employees

Austin's unemployment rate is not only low, it is falling — from a recession-high of 6.5% in 2010. The number of employees in small business, another indicator of economic health, mirrors this trend. In 2012, the number of small business employees hit a five-year high, a strong rebound just three years after a recession low in 2009.

*"Austin's prosperity exists because of the overall health, vitality, and sustainability of the city as a whole—including the skills, hard work, and qualities of our citizens... and developing conditions that foster both local businesses and large institutions."*

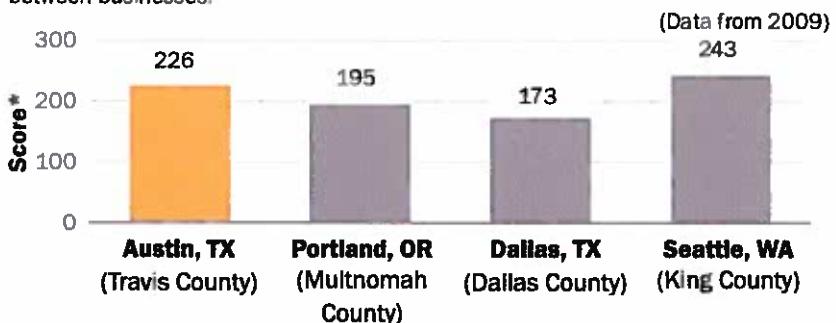

— Imagine Austin Vision p. 87

In the following graphs we've compared Travis County (Austin) to counties with similar population densities, including King (Seattle), Dallas (Dallas), and Multnomah (Portland) Counties. (Data from the Americans for the Arts Arts Index: <http://www.artsinindexusa.org/where-I-live?c4=48453>)

**\*Participation in Arts and Culture\*** score based on a sum of percentages of adults who participate in various art and cultural activities.

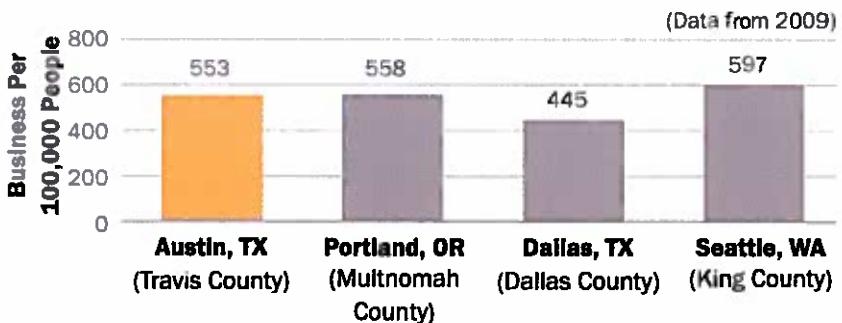

## Participation in Arts and Culture

Part of Austin's economic recovery can be attributed to its creative industries, including growing gaming, digital media, film, and music festival industries, as well as community support of the arts. A large number of for-profit creative industries in Austin suggests there are many options available to residents with strong competition between businesses.

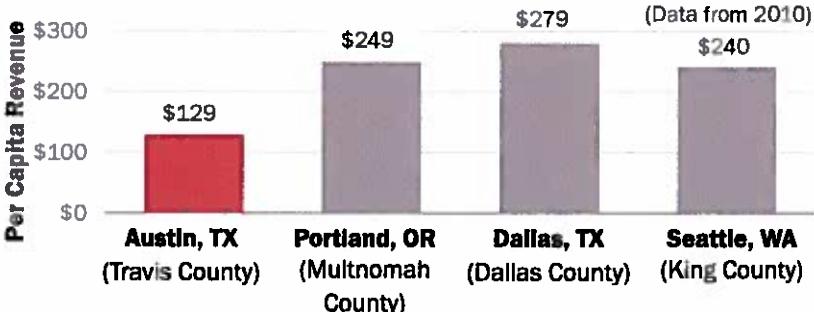

## Creative Industry Businesses (Per 100,000 people)

This growth paired with Travis County's strong participation in the arts and different kinds of cultural activities demonstrates the importance of the arts to the overall community.

## Nonprofits Arts Revenue Per Capita

However, both arts contributions and program revenue streams in the nonprofit arts and culture sector are not as strong in Travis as in the counties where Seattle, Dallas, and Portland reside; in these counties, private giving is more robust.

## Priority Program 3:

**Continue to grow Austin's economy by investing in our workforce, education systems, entrepreneurs, and local businesses**

See page 193 of *Imagine Austin* for more information on Priority Program 3.

### Core Departments

Economic Growth and Redevelopment Services Office, Planning and Development Review, Parks and Recreation, Austin Public Library, Human Resources, Health and Human Services

### Priority Program Team Workplan

The Economic Growth and Redevelopment Services Office was identified as the lead department for this priority program. The team is inventorying the workforce development and educational programs that currently serve Austinites to identify gaps and recommend programs to address needs. They have also added new partners to help achieve the work plan steps and actions.

### Action Matrix: Moving Forward

- ★ **E A1.** Maintain partnerships between local chambers of commerce, business associations, and regional and state economic agencies to develop and improve programs to recruit and retain businesses to Austin.
- ★ **E A13.** Work with local school districts, the University of Texas, Austin Community College, and other area partners to identify gaps in educational programs; the skills needed for current, emerging, and targeted job sectors; and educate students at all levels about the skills needed to compete in a 21st Century economy.
- ★ **E A18.** Partner with the Austin business community to develop policies, regulations, and programs to foster the development of local businesses by developing a mentor program; supporting businesses at each stage of the business life cycle; and enhancing and expanding small business development services to grow market share of small, local businesses.

## **Major Initiatives and Key Accomplishments**

### **Job creation investment.**

The Greater Austin Chamber of Commerce's Opportunity Austin 3.0 includes goals to increase economic diversity and Austin's talent pool through development and attraction by promoting the Austin region to entrepreneurs, business leaders, and site selectors. Goals include increasing per capita income by \$2,400, reducing the poverty rate 6.2%, reducing the child poverty rate 7%, and raising educational attainment (BA or higher) 1.3% by 2018.

### **Capacity building and workforce development.**

- The Economic Growth and Redevelopment Services Office supports Science, Technology, Engineering, and Mathematics (STEM) education programs into Chapter 380 economic development agreements. For example, the Chapter 380 agreement with National Instruments requires the support of STEM education programs for at least 1,000 Austin students every year, representing 10,000 youths mentored for software and robotics careers in the ten year incentive period.
- The International Economic Development Program within Economic Growth and Redevelopment Services Office has partnered with Austin Community College, St. Edward's University, and the Camino Real District Export Council to create a "Careers in a Changing World" program to educate high school students about international career opportunities and educational pathways. Twenty-seven students participated in the pilot phase of the program, and Economic Growth and Redevelopment Services Office is working with its partners to expand the program's reach for academic year 2013-14.

### **The Small Business Development Program.**

The Economic Growth and Redevelopment Services Office maintains a robust Small Business Development Program that assists small businesses and entrepreneurs. This program provides 1,000 hours of free one-on-one business counseling annually, a walk-in Business Solutions Center visited by 4,106 businesses in FY2012, low-cost technical assistance courses to small business owners and entrepreneurs, a free online marketing tool and directory for locally-owned businesses ([LocallyAustin.org](http://LocallyAustin.org)) which has over 900 small businesses registered and 34,657 page-views to date, help navigating the City's Development process (BizOpen), which is used by nearly 300 businesses annually, and a new expansion loan program for small businesses. In addition, in April 2013, the Small Business Development Program hosted its second Elevate Austin Small Business Summit with dozens of small business owners to get their feedback on how the City can better support small business.

**Provision of business and entrepreneurship-related guides and classes.**

Austin Public Library provides a series of business resource information guides on their website and at branch locations. The business resource online guides have been viewed by 4,553 unique library users in the past year. The Austin Public Library also partners with SCORE to offer free classes on business-related topics such as starting a business, finance, marketing, and social media on an annual or semi-annual basis.

**Funding of the University of Texas Austin Technology Incubator.**

The Economic Growth and Redevelopment Services Office and Austin Energy fund the University of Texas Austin Technology Incubator (ATI), which has worked with over 100 companies to obtain \$400 million in external funding over the past five years.

**Creative and Food Sector economic studies.**

The Economic Growth and Redevelopment Services Office commissioned studies on Austin's Creative and Food Sectors to demonstrate the economic impact of these sectors and identify opportunities to accelerate their growth.

**Business recruitment.**

The Economic Growth and Redevelopment Services Office recruits companies that hire blue and green collar workers, developing stronger links between local employers and workforce development activities.

#### **SPOTLIGHT: ANY GIVEN CHILD CREATIVE INITIATIVE**

The Any Given Child Creative Initiative was developed and adopted by the Austin Independent School District (AISD) school board, and endorsed by the City of Austin, following a survey conducted in 2011-12 that collected and analyzed detailed arts participation data from every AISD K-8 school. The study found that AISD's rapidly growing student population living in poverty (72.8%) and English Language Learners (29%) are not receiving equal arts education as other students in the district. Local data reveal clear benefits of arts learning on graduation rates, engagement, motivation, and academic achievement, especially for students living in poverty and those learning English. In order to address these inequities, AISD leadership, in partnership with Mindpop, City staff, and representatives of the creative community, created this strategic arts initiative to ensure every AISD school is "arts-rich" by 2022.

## Priority Program 5: Grow and invest in Austin's creative economy

See page 199 of *Imagine Austin* for more information on Priority Program 5.

### Core Departments

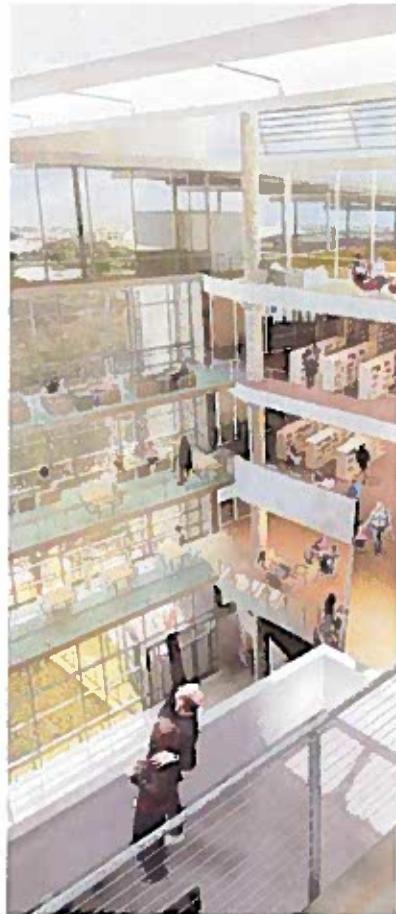

Economic Growth and Redevelopment Services Office, Planning and Development Review, Parks and Recreation, Austin Public Library

### Priority Program Team Workplan

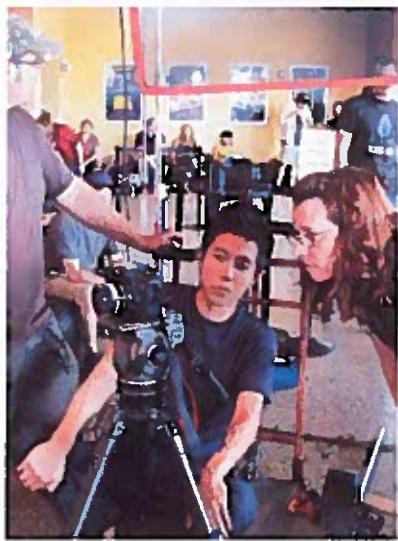

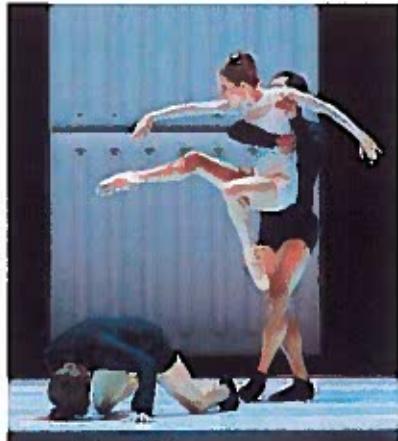

Sub-teams have been formed around three main areas – conducting a creative needs assessment with primary focus on for profit creative industries small businesses in order to identify and implement strategies to build their capacity; developing a cultural tourism plan focusing on inventorying cultural assets during the “shoulder season” and branding and building itineraries around these; and developing and implementing new strategies for creative space development of all kinds and in various places. This last sub-team includes creating new tools for creative space development including using the data from the Artspace Market Survey Report, incorporating creative sector components in the Land Development Code revision, developing cultural resource maps with associated community and economic development strategies, and activating public space.

### Action Matrix: Moving Forward

- ★ **E A9.** Establish and expand policies, programs, and partnerships to support the development of creative industries, including film, music, gaming, etc., in Austin.
- ★ **C A4.** Cultivate cultural and heritage education and tourism by marketing and promoting Austin’s museums, libraries, historic sites and venues, and providing education and training to frontline tourism workers.
- ★ **C A14.** Develop programs and incentives to provide flexible, affordable work space and housing throughout Austin, with an emphasis placed on locations well-served by transit, downtown, and activity centers and corridors for entrepreneurs, small and local businesses, artists, and creative professionals. Programs and incentives should address live-work space, home-based businesses, and temporary lease agreements in multi-use venues such as schools, vacant buildings, and warehouses.

## **Major Initiatives and Key Accomplishments**

### **Investment in the creative economy.**

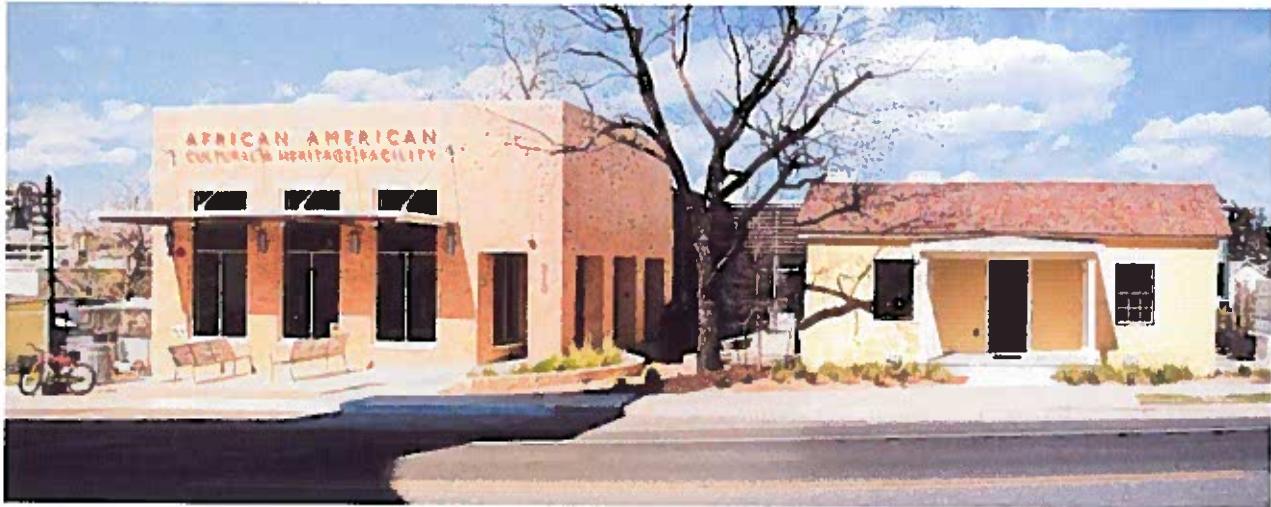

- The Economic Growth and Redevelopment Services Office is exploring financing and regulatory issues for the creative sector including those for individual artists, the traditional nonprofit arts and the for-profit creative industries of music, film, gaming, and digital media and others.
- Council approved funding for the “Creative Content Incubator” with Troublemaker Studios. The Creative Incubator’s purpose is to foster the commercialization of local talent, stories, gaming, film, and television production through a private partnership with the successful film maker. The performance measures include attracting at least one major motion picture to Austin every year while hiring 130 film employees per film annually, and working with educational institutions to offer more internships and opportunities to students.

### **Capacity building and workforce development.**

The City offers programs such as “Take it to the Next Level” workshops/presentations/expos, the Mexican-American Cultural Center’s Latino Arts Residency Program, and Small Business Development Program that teach creative professionals business skills. The Small Business Development Program runs the Family Business Loan Program with the mission to enable existing local businesses, including creative businesses, to expand and create jobs.

### **Development and redevelopment of centers for culture and the arts.**

The Asian American Resource Center and African American Cultural and Heritage Facility opened, providing educational, cultural, and business services to the community. Also, 2012 bonds will fund the redevelopment of the Dougherty Arts Center.

#### Infusion of creative elements in the Seaholm District.

The new Central Library in the Seaholm District, currently under construction, will have gallery space and other artistic amenities. The Seaholm Intake Facility Design Competition, currently underway, is focusing on adaptive re-use that could include artistic amenities.

*The African American Cultural and Heritage facility.*

#### Cultivation of cultural and heritage tourism.

- The Cultural Arts Division received a grant from the National Endowment for the Arts to create a Cultural Tourism Plan and Training in 2014.
- The Austin History Center's Community Archivist Program focuses on African American, Mexican American/Latino, and Asian American history, as well as an online history tour through Historypin.
- The Historic Preservation Office partnered with the University Of Texas School Of Architecture to create the Austin Historical Survey Wiki Project, allowing anyone to find and contribute information about Austin's historic buildings and sites.

#### Activation of public space.

The City's park system became the first municipal parks system to join the Smithsonian Affiliations Program and will help enliven city spaces by using Smithsonian Institution resources for science, history, world cultures and the arts.

In 2013, the Cultural Arts Division, in partnership with Austin Playhouse, contracted with Artspace Projects Inc. to conduct a market survey of individual artists, arts/culture/creativity organizations, and creative businesses. The resulting report assesses the demand for the various kinds of creative space, articulates the specific design elements and building features preferred/required, and describes the individuals and entities affordability levels. This information will assist nonprofits, developers, and others in making informed decisions for new and existing development based on the creative sector's needs, including live/work spaces and creative spaces in mixed-use projects.

# HEALTHY & AFFORDABLE

## Healthy Food + Active Lifestyle + Health Care+ Housing Options + Savings

Priority Programs 6 and 7 promote ways of creating a more livable Austin, by focusing on regulations and investments that allow for a more affordable and healthier place to live.

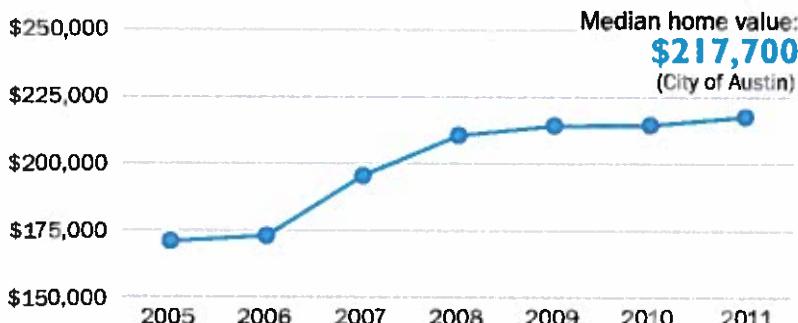

### Current Conditions

Currently, Austinites are experiencing rising housing and rent costs, while salaries are not increasing at the same pace. As a result, the City is becoming increasingly unaffordable to a number of residents. At the same time that household affordability is suffering, there are rising obesity rates and other health concerns in the City.

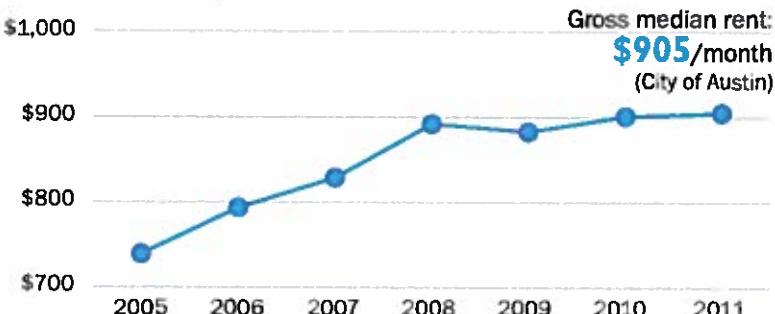

### Housing Affordability

The City's strong population growth paired with slowed housing production during the recession has increased demand for and prices of all types of housing.

#### Home Value

#### Monthly Rent City of Austin

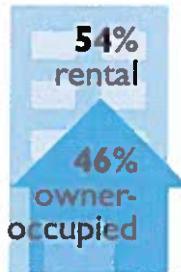

*"People across all parts of the city and...all income levels live in safe, stable neighborhoods with a variety of affordable and accessible homes with access to healthy food, economic opportunity, healthcare, education, and transportation."*

— Imagine Austin Vision p. 87

#### Housing Types

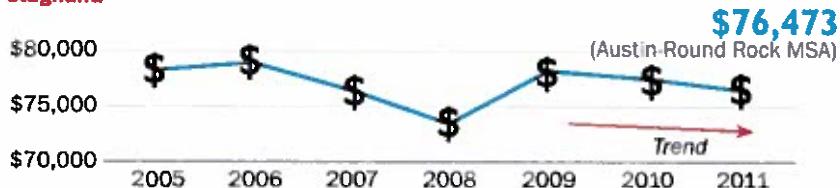

City of Austin

For more information on affordable housing see the City of Austin's FY 2013-2014 Community Needs Assessment: [http://www.austintexas.gov/sites/default/files/files/Housing/Action\\_Plan/FY\\_2013-14/\\_13-14\\_Community\\_Needs\\_Assessment.pdf](http://www.austintexas.gov/sites/default/files/files/Housing/Action_Plan/FY_2013-14/_13-14_Community_Needs_Assessment.pdf)

## Median Family Income (Adjusted to 2012 dollars)

While the cost of housing has increased, household incomes have remained stagnant.

## Cost Burdened Households

Because housing costs have increased while incomes have remained stagnant, Austinites are spending a greater portion of their income on housing. People who spend more than 30% of their income on housing are considered "cost burdened." 28% of Austin home owners and 51% of Austin renter households are cost burdened.

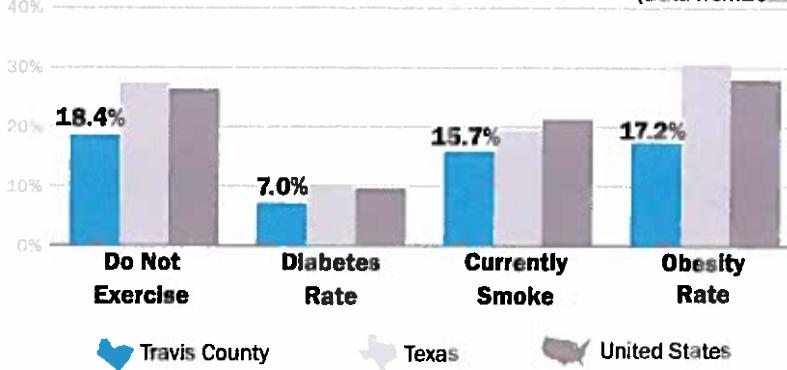

## Health

### Health Indicators

Health indicator data from the Center for Disease Control and Prevention's Behavioral Risk Factor Surveillance System: <http://apps.nccd.cdc.gov/BRFSS-SMART/SelQuickViewChart.asp>

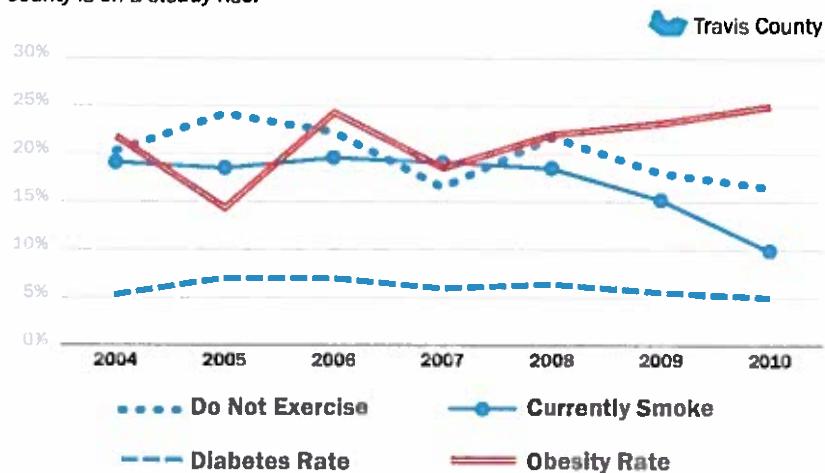

Residents of Travis County are on average healthier and more active than the state and national population.

(Data from 2011)

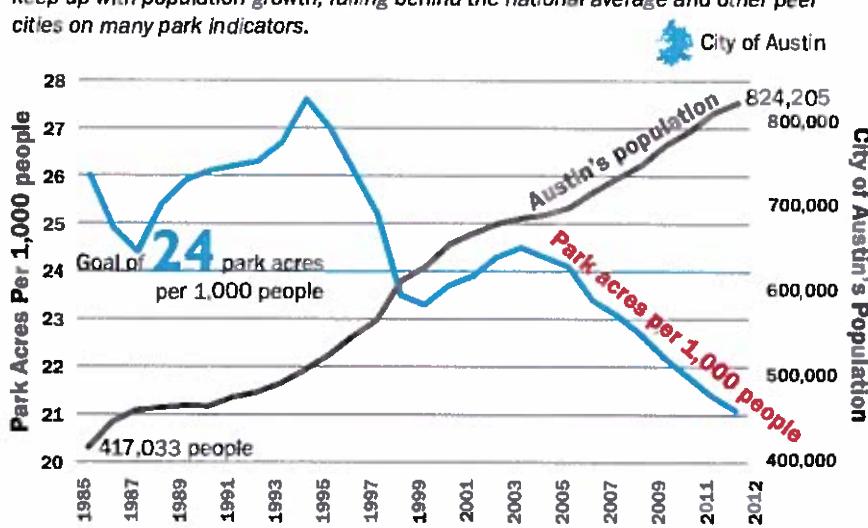

## Health Indicators Continued

Historical data from 2004-2010 provides mixed results on the personal health of those living in the Austin area. The good news is that use of any tobacco products among adults was stable for several years with reported usage beginning a decline in 2009. The prevalence of diabetes and cardiovascular disease among adults has remained stable over time. Despite this, the prevalence of obesity ( $BMI \geq 30$ ) in Travis County is on a steady rise.

## Parkland

One way we can work to combat the increasing obesity rate is to focus attention on ways to allow for increased physical activity. Parks provide important opportunities for people of all ages to get outside and exercise, and can be an indicator of overall community health. Unfortunately, Austin is struggling to acquire enough parkland to keep up with population growth, falling behind the national average and other peer cities on many park indicators.

## Residents in Walking Distance of Parkland

Current Percent: **37%**

of residents living in the urban core live within 1/4 mile of a publicly accessible and child-friendly park or green space.

City Goal: **100%**

Austin falls far outside the national models set by cities such as Denver (90% of residents), Seattle (79% of residents), Minneapolis (99.4% of residents), and Chicago (more than 90% of residents).

See the City of Austin's 2011 Urban Parks Workgroup Report Recommendations: [https://www.austintexas.gov/sites/default/files/files/Capital\\_Planning/Bond\\_Development/Parks\\_Open\\_Space\\_Committee/urban-parks-workgroup-final-report.pdf](https://www.austintexas.gov/sites/default/files/files/Capital_Planning/Bond_Development/Parks_Open_Space_Committee/urban-parks-workgroup-final-report.pdf)

## Priority Program 6: Develop and maintain household affordability throughout Austin

See page 201 of *Imagine Austin* for more information on Priority Program 6.

### Core Departments

Neighborhood Housing and Community Development, Planning and Development Review, Economic Growth and Redevelopment Services Office, Health and Human Services, Code Compliance

### Priority Program Team Workplan

The team has formed three inter-departmental and inter-disciplinary sub-teams to address the primary aspects of their workplan: data and research, dedicated revenue and affordable housing tools, and regulatory practices.

### Action Matrix: Moving Forward

- ★ **HA A3.** Enhance regulations and programs to promote affordable housing by utilizing publicly-owned land; preserving existing affordable housing; allowing for diverse housing types throughout Austin; providing assistance in securing funding; and examining regulations and policies that adversely affect affordable housing.
- ★ **HA A4.** Provide incentives, educational materials, and develop new funding sources for the rehabilitation and repair of affordable housing.
- ★ **S A26.** Promote the development of housing opportunities that support persons transitioning from homelessness to housing stability.

### Priority Program Sub-Teams

#### Data & Research Team

This team will continue supporting the household affordability provisions within *Imagine Austin* by obtaining reliable data and conducting comprehensive research with thorough analysis that will be shared with the other sub-teams.

#### Dedicated Revenue & Affordable Housing Tools Team

This team will analyze opportunities for dedicated revenue streams and other reliable sources of funding for affordable housing activities including ways to ensure long-term affordability and to develop new goals and strategies to promote the distribution of affordable housing throughout the city.

#### Regulatory Practices and Policies Team

This team will coordinate with Priority Program 8 to ensure that affordability is addressed during the Land Development Code revision process, in addition to recommending new policies or amendments to existing ordinances to promote the goals of affordability.

## Major Initiatives and Key Accomplishments

### Planning for a comprehensive report on housing in Austin.

The City will issue a solicitation in 2013 for a consultant team to conduct a combined report including a comprehensive housing market study, an analysis of impediments to fair housing, and an analysis on the preservation of affordable housing in Austin. These reports will provide crucial information on the housing needs of area residents by highlighting trends and future demand for housing; identifying actions to increase housing choice and remove barriers to a fair housing market; and developing strategies for sustainable approaches to achieving the creation and preservation of affordable housing in Austin. The combined report is scheduled for release in 2014.

### Funding of supportive housing units.

The Austin City Council passed a resolution in 2010 giving priority to funding 350 permanent supportive housing units over four years. As of July 2013, the City has added 286 of these units to the pipeline. This includes 181 units that are occupied and 105 that are partially funded.

### Development of recommendations for geographic dispersion.

The Community Development Commission's Affordable Housing Siting Policy Working Group developed a set of recommendations to assist Council in moving forward with geographic dispersion. A component of this policy is the Austin Opportunity Mapping tool that can be used to assess proposed projects or policies, and includes three sets of opportunity indicators: Education; Economics/Mobility; and Housing/Environmental Conditions.

### Growth of the Housing Trust Fund.

The Economic Growth and Redevelopment Services Office negotiated the Green Water Treatment Plant property sale which in 2013 begins to implement the Council resolution requiring 40% of property taxes from City-owned land to be transferred to the Housing Trust Fund, as directed by Austin City Council resolution 000907-72.

### Preparation for an assessment of the Density Bonus Program.

Neighborhood Housing and Community Development is enhancing its reporting on affordable housing policy accomplishments as well as accomplishments through Master Developer Agreements that have produced affordable housing results. This information will be available through a dedicated page on the Neighborhood Housing and Community Development Department's website and will be a part of the department's 2014 Investment Plan and Policy Report available at the beginning of FY2014.

*La Vista de Guadalupe, developed by the Guadalupe Neighborhood Development Corporation (Courtesy of Tre Dunham).*

#### **Planning for the creation of an affordable housing database.**

The Neighborhood Housing and Community Development Department is creating a comprehensive “real-time” database which includes available affordable housing units, services, resources, and incentives to strengthen the process of connecting lower-income buyers and renters with safe, decent and sanitary affordable housing options.

#### **Downtown Density Program.**

In June 2013, the City Council adopted Land Development Code amendments that put in place a Downtown Density Program. These code amendments advance the Downtown Austin Plan’s goal of creating a means for projects to obtain additional height or square footage entitlements in exchange for funding for affordable housing – or even affordable housing units.

#### SPOTLIGHT: RECORD NUMBER OF AFFORDABLE RENTAL UNITS

In the last six years, the City has produced and preserved a combined 3,417 housing units and created more than 2,900 jobs related to the construction and operation of those units. Of these units, approximately 30 percent are leased to households with incomes no greater than 30 percent of the median family income (MFI) (\$21,950 for a four-person household). The remaining 70 percent are leased to households with incomes no greater than 50 percent MFI (\$36,600 for four persons). While this is a significant achievement, there is a remaining need for 12,000 new subsidized units (renting for \$425 monthly or less) for very-low income residents, requiring an average of 1,000 units per year to meet the need between 2008 and 2020.

## Priority Program 7: Create a Healthy Austin program

See page 205 of *Imagine Austin* for more information on Priority Program 7.

### Core Departments

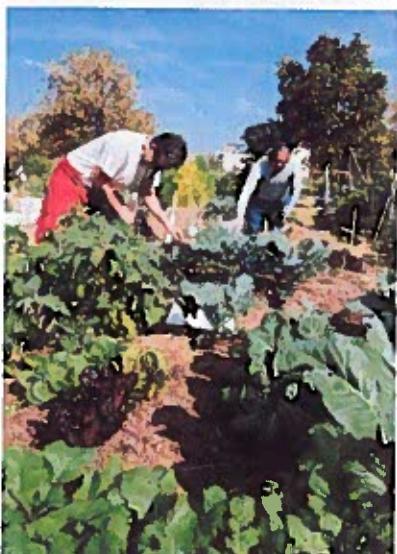

Health and Human Services, Planning and Development Review, Parks and Recreation

### Priority Program Team Workplan

The team has brought in partners to help implement the work program. This team is helping in the creation of the Community Health Improvement Plan, which is a necessary program to complete the first work plan step, creating a Healthy Austin program. They have also worked on a number of initiatives including the tobacco cessation programs, education programs, and expansion of community gardens.

### Action Matrix: Moving Forward

- ★ **CFS A3.** Establish pocket parks, smaller undeveloped preserves, and passive recreational spaces in areas with little open space.
- ★ **S A6.** Partner with healthcare providers such as hospitals and clinics in the region to develop and implement strategies to increase the affordability and access to healthcare.
- ★ **S A10.** Develop partnerships to promote awareness and educate residents about healthy food choices, sources and preparation.

## Major Initiatives and Key Accomplishments

### Economic evaluation of the City's food sector.

The Economic Growth and Redevelopment Services Office completed the City's first economic evaluation of the Food Sector (a \$4 billion industry). Working with TXP and the Sustainable Food Policy Board, the analysis presented a roadmap for the City to address food desert issues, recommendations to capitalize on an unused "brand" opportunity for small business expansion, and opportunity for low and moderate income employment. Recommendations included creation of a regional food distribution hub and a major farmers market modeled on Pike Place Market in Seattle.

### Improvement of nutrition and food access through community gardens.

The City opened gardens in the fall of 2012 at four senior citizen centers (South Austin Senior Activity Center, Virginia L. Brown Community Center, Gus Garcia Recreation Center, and Oswaldo B. Cantu Pan American Recreation Center) in partnership with the St. David's Foundation and is planning a community garden at the Dove Springs District Park. In addition, the Parks and Recreation Department's Sustainable Urban Agriculture and Community Garden Program coordinated outreach events, clean up days, spring plantings, educational programming, organizational management, and design workshops.

### Feasibility analysis of growing food on City-owned land.

The City began a feasibility analysis of City-owned land that can be utilized for community gardening and leased for commercial urban farming.

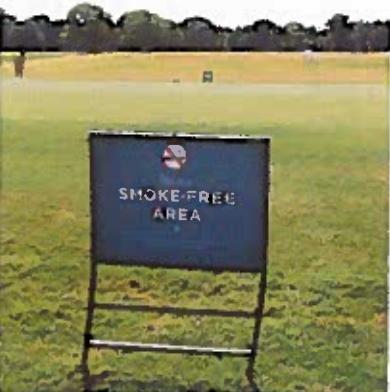

**Acquisition, design and development of parks.**

The City is spending 1998, 2006, and 2012

Bonds, parkland dedication funds, and other grant funds on land acquisition, and park design and development to create diverse public recreational opportunities for all ages, abilities and interests. Since May of 2012, the City has acquired nearly 142 acres of parkland, all in parkland-deficient areas of south and east Austin, and is in varying stages of constructing and expanding four urban infill pocket and neighborhood parks. In addition, the City undertook projects city-wide at metropolitan, district, neighborhood and pocket parks as well as greenbelt and trail corridors as approved under the 2012 Bonds.

#### Promotion of tobacco-free places.

The City promotes tobacco-free public places, including all City parks, trails, green spaces, recreation centers, senior centers, nature preserves, swimming pools, and municipal golf course practice facilities. Health and Human Services, Austin Public Library, Communication Technology Management, and all of Travis County and Capital Metro owned property have implemented a tobacco-free campus policy.

#### The *Imagine Austin* Speaker Series.

In 2012 and 2013, the City held the *Imagine Austin* Speakers Series, which has brought nationally recognized speakers to Austin to speak about ways the built environment affects and can encourage healthy behavior.

#### Improvement of the quality of health care.

Health care organizations, including Seton Family of Hospitals, Community Care, Lone Star Circle of Care, People's Community Clinic, and El Buen Samaritano, are working through the Integrated Care Collaboration to improve the quality of care among indigent care providers through implementing clinical interventions that address cardiovascular disease, diabetes and tobacco use.

### **SPOTLIGHT: HOLLY SHORES / EDWARD RENDON SR. PARK AT FESTIVAL BEACH – MASTER PLAN**

In 2013, the Parks and Recreation Department held a series of design workshops to engage neighborhood residents in helping to shape the vision for Holly Shores and a master plan that includes nearby parkland. The parkland to be redeveloped stretches from Interstate 35 east to Pleasant Valley Road, along the north shoreline of Lady Bird Lake. Design concepts have emphasized the waterfront, with features envisioned such as a beach, decks, and a wide footbridge out into the water.

The master plan includes redevelopment of Edward Rendon Sr. Park at Festival Beach, Fiesta Gardens, and the Holly Power Plant Site. The decommissioned plant will provide an additional nine acres of parkland.

The long-term vision is to enhance the quality of life in the surrounding neighborhoods. This is important for families looking to the future. Completing all aspects of the long-term project could take up to 20 years, depending on funding. The first phase of improvements for implementation of this master plan is funded under the 2012 Bonds. Health benefits could include opportunities for play, fitness, fishing, swimming, kayak/canoeing, art, a museum, a destination for small events, and new trails and roads for better connectivity for pedestrians, bicyclists and vehicles.

**Lady Bird Lake Boardwalk Project.**

This project will improve connectivity by bridging the southeastern gap of the Lady Bird Lake hike and bike trail. It is an example of accomplishments that will be highlighted in future annual reports.

# Appendices

1. **Appendix 1:** Includes the purpose of the Annual Report (see *Imagine Austin*, p. 223).
2. **Appendix 2:** contains an Action Matrix listing the status of *Imagine Austin* actions that fall under priority program topics. For a full list of the actions for achieving the plan's vision and goals, see *Imagine Austin*, pp. 228-266.
3. **Appendix 3:** contains baseline data on key indicators, or metrics that will be used to measure whether or not the goals and vision of the plan are being met. Some of these indicators are included in the body of the report to illustrate the City's current conditions. The Five Year Evaluation and Appraisal Report will include a full review of these indicators.
4. **Appendix 4:** provides greater detail about the *Imagine Austin* outreach events that were summarized in Section III under Education & Engagement.
5. **Appendix 5:** includes the correction of a few minor errors in the plan document.

# APPENDIX I: PURPOSE OF THE ANNUAL REPORT

## Documenting Progress: Plan Monitoring and Review

Regular evaluation and monitoring of the *Imagine Austin Comprehensive Plan* is a key component of the implementation strategy. If the plan is to remain useful and effective over time, the City must establish a method to measure the successes and challenges in achieving its vision, goals, and implementation strategies. Ongoing monitoring will inform the City Council, Planning Commission, City of Austin administration and departments, partner organizations, and the public about the plan's effectiveness; identify those aspects of implementation that are working well and those needing improvement; and keep the plan current as circumstances change and new information becomes available. The monitoring process provides a way to measure progress and get feedback from policy makers and the public to determine if the implementation program is working to achieve the *Imagine Austin* vision. Plan monitoring includes two primary components: annual program monitoring of recommended initiatives, programs, or regulatory changes; and longer term performance monitoring using indicators to measure whether the recommended actions are achieving desired results. These components will be documented using the two monitoring and review mechanisms identified in the Austin City Charter—the Annual Report (program monitoring) and the periodic (i.e., five-year) Evaluation and Appraisal Report (performance monitoring).

### Annual Report (Program Monitoring)

The Annual Report assesses the City's progress in accomplishing the priority programs identified in the *Imagine Austin* Implementation plan. The report will include:

- Projects and policies (including capital improvements) implemented and the alignment of those projects and policies with the goals of the plan
- An annotated matrix indicating the implementation status and benchmarks of each priority program
- The work program for the coming year
- Suggestions for updates to the comprehensive plan needed to respond to new issues and changing conditions, for consideration by City Council.

The Annual Report will be submitted by the Planning Commission to the Mayor and City Council at the end of each fiscal year.

## APPENDIX 3: COMPLETE COMMUNITY INDICATORS

*Imagine Austin* requires a five year Performance Monitoring Report that includes “Complete Community” Indicators to track the progress of the priority programs. City Staff and the Planning Commission have spent the past year reviewing and refining these indicators.

An initial step during this process was to review the metrics and indicators mentioned in chapter 5 of *Imagine Austin*. Staff found that many indicators were not measurable, or overlapped others. Therefore, we developed the following criteria and added, removed, or refined indicators if they had:

- ★ relevance to the priority programs
- ★ the staff resources to support data collection
- ★ information that can be used by planners and others when faced with decisions
- ★ measurable information, with achievable results, as opposed to anecdotal information
- ★ a tendency to show change over a relatively short period of time
- ★ reliable, consistent, and relatively free sources of data

The remaining indicators were put in two groups. The first group forms core measures that are important to *Imagine Austin* and can be reasonably tracked by staff. These were reviewed and approved by the Comprehensive Plan Committee of Planning Commission on February 11, 2013, and are provided on the following page with the latest available data. It is also available on the City Data portal, at <https://data.austintexas.gov/Government/Draft-Imagine-Austin-Indicators/d7k5-jyb8>.

The remaining “additional” indicators that were in *Imagine Austin*, and met the above criteria, are primarily available in other reports and tracked vigorously by outside partner agencies or departments. These can be viewed at <https://data.austintexas.gov/Government/Draft-Additional-Imagine-Austin-Indicators/7dis-buys>, along with links to the respective reports.

Indicators may be revised, removed, or added as research and analysis continues.
